NICOLE GALLOWAY, CPA Missouri State Auditor

Honorable Michael L. Parson, Governor and Members of the General Assembly Jefferson City, Missouri

The primary objective of this report is to show Missouri's spending of federal assistance from the American Rescue Plan (ARP) Act in the month of August 2022 for the Coronavirus Disease 2019 (COVID-19) recovery and the cumulative financial activity since the state began receiving funding in May 2021.

In March 2021, Congress passed the ARP Act signed into law to provide assistance to citizens, businesses, healthcare facilities, and government entities for the COVID-19 recovery. The funding received by or made available to Missouri state government agencies will help pay for the state's recovery from the COVID-19 pandemic and provides (1) state and local recovery aid, (2) temporary additional federal matching funds for the state's Medicaid program (MO HealthNet) and other applicable programs, (3) funding for elementary and secondary schools and institutions of higher education, and (4) funding for various other assistance and benefit programs. The state is passing through some of the funding to local governments. A large part of the funding authorized in this legislation will be sent directly to local government entities. The majority of the funding has specific restrictions on its use or state actions and must be spent in defined limited time periods.

In August, the state spent \$371.1 million from federal ARP Act assistance (Appendix A). Through the end of August, the state has received \$4.6 billion and spent \$1.79 billion from this assistance. Details of the cumulative financial activity by fund are presented in Appendix B and the expenditures by appropriation in Appendix C.

Mole L. Caller

Nicole R. Galloway, CPA State Auditor

Executive Summary	Missouri has been awarded federal funding under the American Rescue Plan (ARP) Act of 2021 (Public Law 117-2, H.R.1319) signed into law in March 2021. Under the act, the state has also been awarded as of August 31, 2022, approximately \$10.96 billion of additional or new funding under various federal grant programs for local and state fiscal recovery funding, emergency rental assistance, elementary school and higher education funding, laboratory expansion capacity for school testing, child care development block grants, child care stabilization grants, vaccine preparedness and access, transportation funding, and administrative costs. Each grant program has a separate time limit on use of the funding. The following sections discuss the amount and funding purpose of significant award sources.
State and local fiscal recovery funding	Of the awarded amounts, \$2.69 billion is for state fiscal recovery funding and \$2.473 billion is for local fiscal recovery funding. The local government recovery funding is \$1.192 billion for counties, \$831 million for cities with a population generally of 50,000 or more, and \$450 million for other local jurisdictions with populations generally below 50,000. The award also includes \$196.7 million from the Coronavirus Capital Projects Fund for the state.
	These funds may be used to cover eligible costs incurred during the period that begins on March 3, 2021, and ends on December 31, 2024, as long as the award funds for the obligations incurred by December 31, 2024, are expended by December 31, 2026. Costs for projects incurred prior to March 3, 2021, are not eligible.
	This funding can be used for public health and economic needs; to provide premium pay to eligible workers; to replace lost revenue; and water, sewer and broadband infrastructure investment.
Public health and economic needs	Recipients may use the funding to provide resources for governments to meet the public health and economic needs of those impacted by the pandemic in their communities, as well as address longstanding health and economic disparities, which amplified the impact of the pandemic in disproportionately impacted communities, resulting in more severe pandemic impacts. The eligible use categories include (1) public health, (2) assistance to households, (3) assistance to small businesses, (4) assistance to nonprofits, (5) aid to impacted industries, and (6) public sector capacity.
	In general, to identify eligible uses of funds in this category, recipients should (1) identify a COVID-19 public health or economic impact on an individual or class (i.e., a group) and (2) design a program that responds to that impact. Responses should be related and reasonably proportional to the harm identified and reasonably designed to benefit those impacted.
	Recipients may use the funding to restore and bolster public sector capacity, which supports the government's ability to deliver critical COVID-19

services. There are three main categories of eligible uses to bolster public sector capacity and workforce:

- Public safety, public health, and human services staff •
- Government employment and rehiring public sector staff
- Effective service delivery •

In addition to programs and services, the final rule¹ clarifies that recipients can use funds for capital expenditures that support an eligible COVID-19 public health or economic response. For example, recipients may build certain affordable housing, childcare facilities, schools, hospitals, and other projects consistent with final rule requirements.

Recipients may provide premium pay to eligible workers performing essential work during the pandemic - generally those working in-person in key economic workers sectors - who are below a wage threshold or non-exempt from the Fair Labor Standards Act overtime provisions, or if the recipient submits justification that the premium pay is responsive to workers performing essential work. Premium pay may be awarded to eligible workers up to \$13 per hour. Premium pay must be in addition to wages or remuneration (i.e., compensation) the eligible worker otherwise receives. Premium pay may not exceed \$25,000 for any single worker during the program.

> The final rule governing use of this funding, broadens the definition of "eligible" worker. Premium pay may be awarded in installments or lump sums (e.g., monthly, quarterly, etc.) and may be awarded to hourly, part-time, or salaried or non-hourly workers. Premium pay must be paid in addition to wages already received and may be paid retrospectively. A recipient may not use this funding to merely reimburse itself for premium pay or hazard pay already received by the worker, and premium pay may not be paid to volunteers.

Recipients may use funding available to provide government services affected by a revenue reduction resulting from COVID-19. The federal government gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue.

> Recipients have 2 options to determine lost revenue (1) elect a "standard allowance" of \$10 million to spend on government services through the

Provide premium pay to eligible

Replace lost revenue

¹ U.S. Department of the Treasury, Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule, January 2022. The final rule took effect April 1, 2022; however, recipients could take advantage of the final rule's flexibilities and simplifications before the effective date.

period of performance² or (2) calculate their actual revenue loss using the formula provided in the final rule. All recipients may elect to use the standard allowance instead of calculating lost revenue using the formula provided, including those with total allocations of \$10 million or less. Electing the standard allowance does not increase or decrease a recipient's total allocation. Under the second option, recipients calculate revenue loss at four distinct points in time, either at the end of each calendar year (e.g., December 31 for years 2020, 2021, 2022, and 2023) or the end of each fiscal year of the recipient using a 4 step process detailed in the final rule. Water, sewer and broadband Recipients can use provided funding to make investments in water, sewer and broadband infrastructure. Awarded funds may be used to cover costs incurred infrastructure investment for eligible projects planned or started prior to March 3, 2021, provided that the project costs covered by the funds were incurred after March 3, 2021. The final rule significantly broadens eligible broadband infrastructure investments to address challenges with broadband access, affordability, and reliability, and adds additional eligible water and sewer infrastructure investments, including a broader range of lead remediation and stormwater management projects. Counties and cities with populations primarily greater than 50,000 will Distribution and reporting receive their funding directly from the federal government. Other jurisdictions with populations primarily less than 50,000 will receive their funding distribution through the state and cannot receive more than 75 percent of their budget as of January 27, 2020. The state will have to distribute funds within 30 days of receiving them, subject to possible approved extensions. States that miss the deadline and any extensions would have to return any undistributed funds. The funds will primarily be distributed in two distributions, with half delivered no later than 60 days after the date on which the state or local government receiving funding directly from the federal government submits the required certification form, and the remainder no earlier than a year later. State and local governments cannot use the funds towards pensions or to offset revenue resulting from a tax cut enacted since March 3, 2021. They can transfer funds to private nonprofit groups, public benefit corporations involved in passenger or cargo transportation, and special-purpose units of state or local governments.

² The time period recipients can spend this funding.

	The state and cities and counties with populations of more than 250,000 residents had to file a Recovery Plan Performance Report by August 31, 2021, with the federal government and will have to file that report annually thereafter by the end of July. Each Recovery Plan Performance Report must be posted on the public-facing website of the recipient by the same date the recipient submits the report to the Department of the Treasury.
	By January 31, 2022, the state and cities and counties receiving funding directly from the federal government also had to file a Project and Expenditure Report and then thereafter 30 days after the end of each quarter. Other jurisdictions receiving their distribution from the state were required to file that report by April 30, 2022, but only annually thereafter.
Medicaid (MO HealthNet) funding	For Medicaid Federal Medical Assistance Percentage (FMAP) ³ funding the act:
	• Provides a temporary (for 2 years after implementation) 5 percent FMAP increase for states that enact the Affordable Care Act's Medicaid expansion. Missouri began implementing Medicaid expansion by accepting applications on August 10, 2021, though the state did not begin processing applications until October 1, 2021. Coverage will be available retroactive to July 1, 2021, consistent with a state supreme court order.
	• Increases the federal FMAP by 10 percent for state expenditures on home and community based services for 4 fiscal quarters if certain requirements are met. In September 2021, the state received approval from the federal government for its projected spending plan to enhance, expand, and strengthen home and community-based services related to the increased FMAP.
	• Provides an 85 percent FMAP for the first 3 years that a state covers mobile crisis intervention services for mental health or substance use disorders, expiring after 5 years.
	The act also eliminates the cap on the rebate amount manufacturers are required to pay Medicaid on covered drugs, starting in 2024.

³ Another federal act in early 2020 provides Missouri a 6.2 percent FMAP increase beginning January 1, 2020, for MO HealthNet and other applicable programs. That increase remains available for qualifying expenditures incurred on or after that date and through the end of the quarter in which the COVID-19 public health emergency, including any extensions, ends. The state had an FMAP percentage of approximately 66 percent prior to that act. The FMAP is used as a base for the Enhanced FMAP (EFMAP) for the state's Children's Health Insurance Program (CHIP). Therefore, the increase in FMAP will also result in an increase in EFMAP, but not necessarily by 6.2 percent. The state's EFMAP rate was approximately 87 percent prior to the 2020 increase.

	Federal ARP Act Funding for COVID-19 Recovery August 2022 Executive Summary
Education funding	The Department of Elementary and Secondary Education will receive \$1.96 billion from the act. At least 90 percent of that funding must be distributed to local school districts. The districts must reserve at least 20 percent of that funding to address learning loss. The department will also receive \$68.6 million for distribution to non-public schools. The funding will remain available through September 30, 2023.
	Public and private institutions of higher education will receive \$627 million from the act. At least 50 percent of the allocated funding received must be spent on emergency financial aid for students. The funding will remain available through September 30, 2023.
Spending status	In August, the state spent \$371.1 million from federal ARP Act assistance (Appendix A). Through the end of August, the state has received \$4.6 billion and spent \$1.79 billion from this assistance. Details of the cumulative financial activity by fund are presented in Appendix B and the expenditures by appropriation in Appendix C.

¹ Historically, the Department of Public Safety (DPS), State Emergency Management Agency (SEMA) uses this fund to account for state emergency grants unrelated to the ARP Act. However, for the 2 fiscal years ending June 30, 2023, the DPS-SEMA is also using this fund to account for up to \$1,858,226 in ARP Act funding for emergency management performance grants (to support the Missouri Information Analysis Center, the Missouri Interoperability Center, and local emergency management agencies). The receipts, disbursements, and beginning and ending fund balances listed include only the ARP Act activity within this fund. In addition, the beginning and ending fund balances could occasionally be negative if the DPS-SEMA makes disbursements in advance of the related drawdown of federal funds. This fund is excluded from Appendix C because its appropriation authority does not distinguish between ARP Act and non-ARP Act activity.

² This fund relates to Department of Social Services (DSS) program activity, primarily for the Medical Assistance Program (Medicaid), Children's Health Insurance Program, and some other public assistance programs. The DSS initially uses state funds to cover these program expenditures, and then obtains federal reimbursement. A portion of each reimbursement includes a temporary ARP Act-related increase in the state's matching rate, and is receipted into this fund. We are now reporting all receipts into the fund during the 2 fiscal years ended June 30, 2023, as disbursements, to reflect that these receipts are reimbursements of disbursements incurred from other sources. This fund is excluded from Appendix C because its appropriations are not used for ARP Act purposes.

¹ This fund is used by the Department of Economic Development (DED) to support the federal Emergency Rental Assistance Program (also called the State Assistance for Housing Relief for Renters and Landlords Program in Missouri). It was established in fiscal year 2021 primarily for spending federal COVID-19 assistance from another federal act; however, the DED has occasionally used it to receipt and disburse ARP Act awards due to grant drawdown and budgetary timing challenges.

² Historically, the Department of Public Safety (DPS), State Emergency Management Agency (SEMA) uses this fund to account for state emergency grants unrelated to the ARP Act. However, for the 2 fiscal years ending June 30, 2023, the DPS-SEMA is also using this fund to account for up to \$1,858,226 in ARP Act funding for emergency management performance grants (to support the Missouri Information Analysis Center, the Missouri Interoperability Center, and local emergency management agencies). The receipts, disbursements, and beginning and ending fund balances listed include only the ARP Act activity within this fund. In addition, the beginning and ending fund balances could occasionally be negative if the DPS-SEMA makes disbursements in advance of the related drawdown of federal funds. This fund is excluded from Appendix C because its appropriation authority does not distinguish between ARP Act and non-ARP Act activity.

¹ The appropriation authority is the maximum amount that may be expended for the purpose as documented and approved through appropriations bills.

- ² This fund had \$13,826,934 in expenditures in June 2021 from a similar appropriation in fiscal year 2021. Due to the limited use of ARP Act funds in fiscal year 2021, appropriation activity for fiscal year 2021 will not be included in this report.
- ³ House Bill 3002 section 328 does not clearly describe all appropriations within the Child Care Stabilization Federal Emergency 2021 Fund and Child Care Discretionary Federal Emergency Relief 2021 Fund. Words presented in quotation marks are cited from the Statewide Accounting System's (SAM II) internal description. There were no expenditures from these appropriations through August 2022.
- Source: Statewide Accounting System (SAM II). The appendix is presented on the state's legal budgetary basis of accounting that records expenditures when the liabilities are recorded, rather than when cash is disbursed.
